

LOG HOME CONCEPT

INDIVIDUAL LIFE STYLE

Create your own unique home with our solutions that are included in the standard delivery or modify the design with our collection of additional products.

We have delivered homes to every continent, to 48 countries so far, and specialize in tailor-made designs. There are as many different Artichouse homes as there are our customers.

WHAT WILL YOUR HOME LOOK LIKE?

THERE IS PLENTY TO CHOOSE FROM WITH ARTICHOUSE

The internal finishes can be chosen between be our rustic log paneling, ceiling paneling and floor boarding. Different atmospheres can be created by staining the wood to the color you choose. The walls and ceilings can also be plastered and painted to the color you wish for, if the paneling is replaced by gypsum board.

These two cabins are very similar in design, but the interior atmosphere is different because of the different treatment of wooden surfaces and choice of furniture. The plastered walls emphasize the wooden framed windows.

DOOR SELECTION

The exterior doors complement the architecture of the house and should be in harmony with the overall design: it should look inviting on the outside and be a natural part of the entrance hall on the inside.

Here are two examples of the same door design - other is painted with a dark grey paint and the other has a translucent treatment

A vast selection of handles is available. The door handles are of similar design as the window handles. Lockable handles will be delivered for our UK deliveries.

TOKYO

Light Oak

HERE ARE EXAMPLES OF THE VARIOUS DOOR DESIGNS WE CAN SUPPLY

Vertical paneling gives the external doors a more narrow appearance

Lattices can be included in all door designs with a window

On the contrary, horizontal paneling makes the doors seem wider than they are

Fishbone pattern gives the doors a distinctive look

There are also various custom designs available

TERRACE & BALCONY DOORS

Terrace doors create an unobstructed access between the warm area and terrace of the house. There are multiple different designs available: double doors, sliding doors and folding doors.

Double doors are the easiest of doors for children to use and suit very well for traditional designs.

Sliding doors frame the outside view beautifully without having such thick frames as double doors.

**Standard:
wooden surface*

**Additional:
aluminium cladding*

Folding doors can be opened and retracted fully to create a large open passage on warm summer days. Our customers are always free to choose the terrace door of their preference.

INTERNAL DOORS

Our internal doors complement the other wooden surfaces of the house. The doors can be delivered untreated or varnished and there is a vast selection of handles available.

Our standard handle is shown in this picture, metal lever with a wooden handle.

STAIRS

The standard Artichouse stairs are made of sturdy Finnish Pine, just like our log walls. The standard surface treatment is clear varnish. Our stairs are always designed to be safe and easy to use.

Contrast can be created by staining the steps to a darker color.

Depending on your wishes, we can also design and supply the stairs painted or varnished to the color of your choice. The color of the stairs can reflect the overall color scheme of the room.

Glass railings allow light to travel freely and do not obstruct the view in the room.

ARTICHOUSE WINDOWS

Our windows are always finished to the highest standard. Northern, slow-grown pine is a great material for the windows because of its high durability. Trickle ventilators can be installed to all windows if this is locally required.

A vast selection of handles is available. The window handles are of similar design as the exterior door handles. Lockable handles will be delivered for our UK deliveries.

ADDITIONAL PRODUCTS: EXTERIOR TREATMENT

We can include Tikkurila treatments for the external treating of wooden surfaces of your home. The water soluble Valtti Akvacolor & Valtti Base (for priming) are by far their best products for external wooden surfaces. There is a wide range of colors available. Digital monitors and displays always distort the colors to a certain extent, please ask for a color chart and we will send it to you by mail.

VALTTI AKVACOLOR BY TIKKURILA

ADDITIONAL PRODUCTS: ROOFING

We can supply a top of the line roofing system from the Finnish manufacturer Icopal. Our roofing kit includes Icopal bitumen felt with accessories:

- Plano XL or Plano Pro bitumen felt
- Plano Pro Combi (ridge/eaves strip)
- Plano (underlayment) TL4
- Tin plates for eaves – sides & gables
- Rubber bitumen glue for eaves

The wider rectangular Plano XL is available in graphite grey and black anthracite.

The octagonal Plano Pro is available in multiple colors

ADDITIONAL PRODUCTS: MADE-TO-MEASURE DELIVERY

A log home includes a lot of timber framing at site. In our standard deliveries, the timber framing is delivered to the building site in full lengths, with cutting instructions marked in the drawings and material lists.

To radically reduce the time required for building our kit, we can supply the structural timber as made-to-measure to the building site.

Please ask for more information and we will calculate the additional cost for preparing the structural timbers to exact lengths at our factory before delivery.
